

My AI Workflow Guide

This guide outlines how I use a stack of AI tools to think, research, execute, and create output efficiently.

Core Thinking & Creation

Claude → deep thinking and structured writing

ChatGPT → daily execution and ideation

Research & Knowledge

Perplexity → fast, source-backed answers

NotebookLM → working with your own documents

Ecosystem AI

Copilot → Microsoft integration

Gemini → Google ecosystem and multimodal use

Output & Storytelling

Gamma → presentations and visual storytelling

Workflow

Think → Claude

Research → Perplexity + NotebookLM

Execute → ChatGPT

Integrate → Copilot + Gemini

Present → Gamma

Why This Works

Using the right tool at the right moment turns AI into a real productivity system.
